UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, DC 20460

2002 Model Year Certificate of Conformity

Manufacturer: **Deere Power Systems Group of Deere and Company**
Certificate Number: **JDX-MHDD-02-02**
Effective Date: **2/13/02**
Date Issued: **2/13/02**

Gregory A. Green, Director
Certification and Compliance Division
Office of Transportation and Air Quality

Pursuant to Section 206 of the Clean Air Act (42 U.S.C. section 7525) this certificate of conformity is issued to the above named manufacturer for:

Heavy Duty (MHDD CA. Optional 2.5 NOx std.) Natural Gas Engine Family: 2JDXH08.1004

as approved by the California Air Resources Board in **A-108-0028**. This certificate of conformity covers only those new motor vehicle engines which: (1) conform, in all material respects, to the design specifications that applied to those engines described in the application submitted to the California Air Resources Board; (2) are covered by said executive order; (3) are only introduced into commerce in the State of California or a State contiguous to California or in a state that, under the authority of Section 177 of the Clean Air Act, has adopted and placed into effect the California standards to which this engine family is certified or a State contiguous to such a State; and (4) are labeled as belonging to said engine/evaporative family.

This certificate is issued subject to the conditions specified in 40 CFR 80.24 if unleaded gasoline was used in any testing or service accumulation pertaining to said California Air Resources Board executive order.

Catalyst equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, Mexico, and Japan will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program approved by the Administrator.

In the case of completely assembled vehicles, this certificate of conformity covers only vehicles which are completely manufactured prior to January 1, 2003. Normally, incompletely assembled vehicles (such as cab chassis) may be completed after this date, provided that the basic manufacturing (including installation of the emission control system) was completed prior to January 1, 2003.
