Excavator Operator Training Simulator

John Deere’s Excavator Operator Training Simulator is a cost-effective, safe, and efficient way to train new operators in a risk-free environment. Eight highly detailed and realistic lessons teach proper operator technique, machine controls, and safe operation in a virtual jobsite. Simulator training allows a new operator to become familiar with the controls while gaining the confidence needed before stepping foot in a real machine.

$10,249 USD

Plus tax, shipping and where applicable duties, tariffs, or brokerage fees.
Note: The price does not include a computer or display. The customer is responsible for providing a laptop or desktop computer to run the simulator software meeting the minimum requirements and a display device such as a LCD TV.
