### GreenStar Rate Controller Kits:
GreenStar Rate Controller enables rate control of many implements through the GreenStar 3 2630 or GreenStar 2 2100 and 2600 Display. See Ag Sales Manual for compatibility. Requires a GreenStar Ready machine with ISO Implement Connector and GreenStar 3 2630 or GreenStar 2 2100 and 2600 Display.

- **PF90683** Rate Controller CCS Drill Clutch Adapter Harness - 1690, 1890 and 1990 CCS Models
  - For connecting the Rate Controller to existing half-width disconnects on CCS machines.
  - Controls two sections.
  - 260.70

- **PF90621** Rate Controller Hardi Adapter Harness
  - Connects the Rate Controller to Hardi Pull-Type Sprayers.
  - 357.50

- **PF90577** Rate Controller Implement Height Sensor
  - Required for NH3 applications.
  - 179.30

- **PF90786** Rate Controller Implement Height Sensor Bracket Kit - Nutrient Applicators (2510S, 2510C & 2510H)
  - The 2510 Nutrient Applicator requires different height sensor brackets than what is included in PF90577. Order PF90577 to attain height sensor.
  - 119.90

- **BPF10044** Rate Controller In-Cab Installation Kit
  - The kit is used to install the Rate Controller inside the cab of the machine. It is typically used with the GreenStar Ready Universal Guidance Kit BPF10139 in non-Deere applications. The kit can eliminate the need for the Power Harness (BPF10403 and BPF10404), Front Extension Harness (PF90586 or PF90587), and the ISO Implement Connector Harness (part number RE174725).

### Attachments for Field Conversion

Orders for Ag Management Solutions “Attachments for Field Conversion” CANNOT be combined with AMS product orders. Separate “Attachments for Field Conversion” orders are required. Multiple AMS attachments can be ordered on a single “attachments only” order.

#### AutoTrac Integrated Machine Kits:

Machines must be “GreenStar Ready” to be compatible with the AutoTrac Machine Kits below. AutoTrac Machine Kits include the appropriate machine steering controller when necessary and “AutoTrac Ready” accessories. Display, receiver and software to complete system sold separately.

- **PF90876** AutoTrac Combine Machine Kit - 50 Series (PIN 695101 and Above)
  
  Integrated AutoTrac is not available with Field-Mapping or Field-Monitoring. If yield documentation is desired, customer must upgrade to at least Harvest Monitor. If Harvest Monitor is desired and the combine has a moisture sensor installed on the side of the clean grain elevator, the retrofit attachment PF90872 is required; order from ‘Attachments for Field Conversion - Harvest Sensor Kits’. If the combine does not have any sensors installed, attachment PF90874 is required; order from ‘Attachments for Field Conversion - Harvest Sensor Kits’. If no documentation or monitoring is desired, order AH211750 wiring harness from Parts.
