

Rugged. Reliable. Ready.

# New Frontier 33 Series Box Blade: Precision grades made easy

**Knock out big jobs faster with Frontier.** When you're paid by the job, you need rugged, reliable equipment that's ready to work when you are. Plus, you need equipment that's easy to use no matter who is behind the controls. Take the construction-duty Frontier 33 Series Box Blade — designed and built for simple operation, dependable up time, and maximum performance.

The Frontier 33 Series Box Blade easily breaks through compacted ground and tackles a variety of earth-moving chores, from scraping and leveling to backfilling. And with hydraulically operated scarifiers, you can adjust depth on-the-go so you can finish each job faster.

A balanced, heavy-duty welded mast and 5x5-inch tubular steel scarifier beam deliver added strength for the most challenging jobs — there's no need for gussets. Replaceable scarifier points are hardened for durability. Scarifiers have two notched positions for chipping or deep digging action and can be raised out of the way when not needed. Cutting edges are .5x6-inch steel and are reversible for extended life. And the high-capacity, smooth-surface steel box has a fixed tailgate for slicing through the toughest, most challenging terrain.

**The 33 Series Box Blade** has a working width of 84 inches. It's compatible with tractors and backhoe loaders of 40 to 90 horsepower with a Category 1 or 2 three-point hitch. Plus, the 33 Series Box Blade is backed with a one-year warranty and the best dealer network in the industry — John Deere. To help you choose the right Frontier Box Blade, talk to your John Deere dealer.

Construction Grade • Hydraulic Scarifiers

# New Frontier 33 Series Box Blade: Rugged. Reliable. Ready.

## DETAILS

Box blades remove high points and fill in low points by scraping the surface and moving material across the work site. They're perfect for any job that requires precision scraping, leveling, and backfilling.

The fixed tailgate gives the cutting edges extra power to slice through hard, compacted ground.

Scarifier height is easily adjustable. Simply remove the retainer clips and raise or lower the scarifier. Use the low notch for deeper ground penetration.

Knock out big jobs faster with the hydraulically-controlled scarifier beam. You can raise the scarifiers up for backfilling and then lower them for scraping and leveling — all without leaving the tractor seat.

To backfill, raise the scarifiers and use the tractor's top link to control the cutting blade angle.

## SPECIFICATIONS

Model	BB3384
Duty	Construction
Working width	84 in. (2.1 m)
Tractor horsepower (maximum)	90 hp
Hitch	Category 1, 2
Tailgate	Fixed
Scarifier shanks	(8) Notched, 2 positions
Scarifier points	Replaceable, hardened steel
Scarifier beam	5x5x.3125-in. (127x127x7.9 mm) tubular steel, hydraulically operated
Weight	1,324 lb. (601 kg)
Hydraulic kit	Pin kit and hydraulic hose kit included
Endplate thickness	.5 in. (12.7 mm)
Moldboard thickness	.25 in. (6.4 mm)
Cutting edges	(2) .5x6-in. (12.7x152 mm) reversible
Height	36.75 in. (.9 m)
Warranty	1 year
