# PowerTech <sup>™</sup> 6068HF275 Diesel Engine

**Generator Drive Engine Specifications** 

Model	6068HF275				
Number of cylinders	6				
Displacement - L (cu in)	6.8 (415)				
Bore and Stroke mm (in)	106 x 127 (4.17 x 5.00)				
Compression Ratio	17.0:1				
Engine Type	In-line, 4-Cycle				
Aspiration	Turbocharged and air-to- air aftercooled				

Length - mm (in) to rear of block	1116 (43.9)
Width - mm (in)	623 (24.5)
Height mm (in)	1012 (39.8)
Weight, dry - kg (lb)	587 (1294)

#### Performance data range

		5										
Rated speed	Engine power					Rated fa	Rated fan power		Calculated generator set output			
	Prime Standby		ldby	Generator efficiency			Power factor	Prime		Standby		
Hz(rpm)	kW	hp	kW	hp	%	kW	hp		kWe*	kVA	kWe	kVA
50(1500)	111	149	123	165	88-92	4.5	6	0.8	95-99	118-124	105-110	132-138

Prime power is the nominal power an engine is capable of delivering with a variable load for an unlimited number of hours per year. This rating conforms to ISO3046 and SAE J1995.

Standby power is the maximum engine power available at varying load factors for up to 200 hours per year when applied to conform with ISO 8528-1. This rating conforms to ISO 3046 and SAE J1995. Calculated generator set rating range for standby applications is based on minimum engine power (nominal -5 percent) to provide 100 percent meet-or-exceed performance for assembled standby generator sets. \*Electrical power is calculated from the typical generator efficiency and fan power percentages shown. Applications may vary.

## **Features and Benefits**

#### Dynamically Balanced Crankshaft

- Induction-hardened journals for long hours of reliable service
- Robust design to drive machinery from the front of the crankshaft
- Supported by seven main bearings

#### Forged-Steel Connecting Rods

- 45-degree connecting rod/cap-joint design allows the use of large connecting rod bearings for increased durability

#### Replaceable Wet-type Cylinder Liners

- Provide excellent heat dissipation
- Precision machined for long life
- Rebuild to original specifications

## Easy to Apply, Easy to Install

- Front and rear engine mounting pads on the side of the block facilitates installations
- Either side service for filters and service points facilitates packaging
- All connection points in common locations make it easy to install or package

## Compact Size

- High mount or low mount turbocharger position to meet packaging requirements

## World-class Performance

- Excellent fuel economy and low oil consumption

## Fuel System Controls

- Proven and Reliable Mechanical Governer
- 12V or 24V Electric Shutoff

#### Emissions

- EU Stage II
