

ANTI-ALLERGEN CAB AIR FILTERS

John Deere Anti-Allergen Cab Air filters are designed to trap nearly 99% of allergens. Each filter carries both the base cellulose media and activated carbon layers to help keep harmful pollutants, odors and gases at bay.

Anti-Allergen Cab Air filters provide a third polyphenol layer which traps allergens and reduces the growth of bacteria and mold on the filter media. The activated carbon layer is great for gaseous compounds but it's the polyphenol of the third layer that neutralizes pollen spores and other allergens.

Three Layers of Protection

Particle Filter Layer

High-performance filter media blocks nearly 100% of coarse particles such as dust, dirt and pollen and protects against harmful PM2.5 pollutants

Activated Carbon Layer

Removes unpleasant odors and neutralizes harmful gases, including VOCs, sulfur dioxide and nitrogen oxides

Biofunctional Layer

Yellow coating containing polyphenol, is designed to trap allergens, and reduce the growth of bacteria and mold on the filter media

Example: 8235R Tractor needs two cab filters

One (1) TY27783 (*optional replacement for RE284091 fresh air filter*)

One (1) TY27784 (*optional replacement for RE291412 recirculating*)
