

Great performance is built in

Unplanned downtime because of a filter problem? That is never OK. Our products are too big an investment to allow that kind of thing to happen. Use John Deere Filters to keep the dirt out. We offer top-of-the-line filters to help deliver superior performance season after season.

A part of the whole. The important parts

John Deere Oil Filters. Fuel Filters. Air Filters. Hydraulic Fluid Filters. Take a good look at our filter options. We've got you covered. You'll find that simply choosing John Deere Filters can up your productivity, reduce maintenance costs and extend the life of your equipment.

John Deere Oil Filters

Dirty oil causes unwanted wear, shorter engine life and can lead to unplanned downtime. The kind that stops productivity in its tracks. Don't let dirty oil compromise your engine performance. Be sure to use John Deere Oil Filters. The close mesh is engineered to catch small particles, including dirt and other contaminants before they can pollute your engine. In fact, these filters are designed and tested to capture more dust than lesser quality filters. Right down to the smallest particle.

With John Deere Oil Filters, count on:

Even pleats and media spacing. To ensure even filtration for better overall protection without gaps

Spiral and crimped center tube. To add strength to prevent media from collapsing and letting unwanted particles into your system

Rubber gaskets. For a tighter seal than plastic gaskets found in competitive filters

Exceptional performances. To increase recommended drain interval to 500 hours when used with John Deere Plus-50™ II*

Ready for today and tomorrow. Tier 4 engine compliance readiness

What to watch out for in an oil filter:

If the filter does not have adequate dirt holding capacity, dirty oil will begin to bypass the filter prior to the filter change interval

The bypassing of the filter will allow debris into the engine causing unnecessary wear and tear and, potentially, unplanned downtime

**JOHN DEERE
OIL FILTERS**

**+ PLUS-50™ II
ENGINE OIL**

**500 HOURS FREE
OF DOWNTIME**

When you pair John Deere Oil Filters with premium Plus-50™ II Engine Oil, there's no stopping you for 500 hours! Because John Deere Engineers design our maintenance products to work to defend your machine from harsh conditions and wear. Plus, both John Deere Filters and Plus-50™ II are ready to protect new Tier 4 engines.

Don't take your equipment to the field without this winning combo. Trust John Deere Filters and oil to help your machines last.

*500-hour drain interval applies to John Deere Diesel Engines when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan, 2. Machine operates with Plus-50 II Engine Oil API CK-4/SN. 3. Machine uses a John Deere Engine Oil Filter, 4. Machine uses only ultra low sulfur diesel fuel.
