 MATERIAL/MANURE SCRAPERS
MS60 | MS72 | MS84 | MS96

Specifications

- Effortlessly push or scrape manure, mud, light snow, and other wet or sloppy materials. Rubber cutting edges are ideal for cleanup on hard surfaces such as concrete and asphalt.
- Standard pull-back edge works well for cleaning out corners and difficult-to-reach places.
- Bolt-on rubber edges are easy to change and reversible, for extended wear life.
- Like all Worksite Pro™ attachments, these scrapers are optimized to work with John Deere skid steers and compact track loaders (CTLs). They’re also compatible with many competitive models. See your local Deere dealer for details.
