ATTACHMENTS

JOHN DEERE

SKID STEER /
COMPACT TRACK LOADER /
COMPACT EXCAVATOR /
COMPACT WHEEL LOADER

MASTERS OF MULTITASKING.

BUILT-IN VERSATILITY

To get more productivity from your skid steer, compact track loader, compact wheel loader, or compact excavator, hook-up one of our many easy-to-use attachments. The ever-expanding lineup includes more than 100 models, so you're sure to find the right tool for the job. They're compatible with many comparable brands of machines, too. What's more, each is backed by legendary John Deere parts, service, and warranty coverage. Add an attachment, and watch your productivity instantly increase.

ANGLE-TATCH

AT14

SPECIFICATIONS

- Maximizes attachment capabilities by acting as an interface between the carrier and non-hydraulic add-ons.
- Attaches to the Quick-Tatch™ coupler and allows attachments to tilt up to 14 degrees, enabling more precise grading and leveling with buckets, blades, and other non-hydraulic attachments.
- Hydraulic controls to attachments allow the operator to adjust the degree of tilt without having to leave the seat, maximizing comfort and productivity.
- Abrasion-resistant steel plate extends product life.
- Large spherical-ball bushing in center pivot increases strength and durability.

- This Angle-Tatch is optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs) equipped with the skid-steer-style Quick-Tatch coupler.*

*The ISO-style coupler is not compatible with the Angle-Tatch.

AT14	
Overall Width	118.87 cm (46.8 in.)
Overall Height	46.99 cm (18.5 in.)
Overall Depth	10.67 cm (4.2 in.)
Cylinder Bore	6.35 cm (2.5 in.)
Rod Diameter	3.30 cm (1.3 in.)
Tilt Angle	14 deg.
Lift Capacity	1905.08 kg (4,200 lb.)
Weight	191.41 kg (422 lb.)
Vehicle Compatibility	316GR, 318G, 320G, 324G, 330G, and 330 P-Tier SSLs; 317G, 325G, 331G, 331 P-Tier, 333G, and 333 P-Tier CTLs; 184 G-Tier*, 204 G-Tier*, 244 P-Tier*, 304 G-Tier*, and 324 P-Tier* CWLs
<i>*Requires skid-steer-style Quik-Tatch coupler for operation.</i>

AUGERS

PA15B | PA30B | PA40

SPECIFICATIONS

- PA15B and PA30B have a higher-rated operating pressure and feature a larger and more durable motor-shaft seal than previous motors for those models.
- Integral motor and planetary gearbox housing brings the planetary gear set closer to the motor, increasing efficiency and decreasing component stress.
- Gearbox has an updated input shaft with a more sturdy design.
- Maximum torque rating for PA30B increased from 4,166 to 4,500 ft.-lb. and improved gear reduction. The number of planet gears in the PA30B gearbox increased from three to five.
- PA40 bit sizes include 4–36-inch HD, 9–24-inch HD difficult-ground,⁶ 18–36-inch tree and shrub, and 9- or 12-inch rock to match the application.
- These augers are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), compact excavators (CEXs), and compact wheel loaders (CWLs). They're also compatible with most competitive models.

⁶HD difficult-ground bits are designed for compacted soil, heavy clay, asphalt, frozen ground, and fractural rock; they incorporate a cast-tooth holder versus fabricated-metal mountings.

	PA15B	PA30B	PA40
Weight (without mounting bracket)	61 kg (134 lb.)	63 kg (138 lb.)	89 kg (195 lb.)

BALE HUGGER

AH80

SPECIFICATIONS

- Designed for large round and rectangular bales. Maximum opening of 110 inches squeezes bales together for transport, stacking, and loading.
- Round tubing delivers maximum durability and prevents damage to bale wrappings/coverings.
- Right- and left-hand arms open simultaneously and apply constant pressure, eliminating risk of dropped or damaged bales.
- Ideal for 1,000-pound silage bags, with a maximum load of 2,400 pounds.
- This bale hugger is optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs) equipped with a skid-steer-style Quick-Tatch™ coupler. It's also compatible with most competitive models.

AH80	
Overall Width	120.65 cm (47.5 in.)
Overall Height	95.25 cm (37.5 in.)
Overall Depth	137.16 cm (54.0 in.)
Maximum Opening	279.40 cm (110.0 in.)
Lift Capacity	1088.62 kg (2,400.0 lb.)
Operating Weight	217.72 kg (480.0 lb.)
Vehicle Compatibility	316GR, 318G, 320G, 324G, 330G, and 330 P-Tier SSLs; 317G, 325G, 331G, 331 P-Tier, 333G, and 333 P-Tier CTLs; 184 G-Tier*, 204 G-Tier*, 244 P-Tier*, 304 G-Tier*, and 324 P-Tier* CWLs
*Requires skid-steer-style Quik-Tatch coupler for operation.

BALE SPEARS

AB21 | AB31 | AB32 | AB42 | AB43

SPECIFICATIONS

- Offering optimal rigidity and capacity, these John Deere bale spears are built for a long working life and designed for the loading, carrying, and stacking of baled organic materials typically used for livestock feed and bedding in agricultural applications.
- Low-profile design provides unrestricted visibility to the bale spear and tine tips.
- Round bale spears are replaceable and come in three different configurations of single, dual, or triple to help match numerous bale-handling applications.
- Round bale tines are retained with cross-bolts, making them easy to replace.
- Quick-Tatch™ mounting provides quick and easy hookup and removal.
- These bale spears are compatible with all skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs) equipped with a skid steer-style Quik-Tatch coupler.

ANGLE BROOMS

BA72C | BA84C | BA96C

SPECIFICATIONS

- Angle brooms feature a 32-inch-diameter brush with standard 50/50 poly-wire segments. Optional all-polypropylene brush segments are available.
- Brush-core removal for bristle replacement is quick and easy, with no tools required. Motor and bearing separate from the brush core without having to disconnect any hydraulic hoses, eliminating the risk of oil spills or contamination.
- Heavy-duty, high-torque, bidirectional motor is coupled to the brush core through a 2.5-inch hex hub. Motor and bearing are protected within the broom-frame structure.
- Hydraulic-angling range of 30 degrees to right or left is standard.
- Optional hood extension provides 180-degree brush coverage; a rubber deflector prevents snow from blowing back onto the machine when winter strikes.
- Foldaway storage stands help the brush maintain its round shape when not in use.
- Optional 30-gallon roof-mounted water-tank kit is available for applications that require dust suppression.
- These angle brooms are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with most competitive models.

PICK-UP BROOMS

BP72C | BP84C | BR60C | BR72C | BR84C

SPECIFICATIONS

- Pick-up brooms feature a 26-inch-diameter brush with standard 50/50 poly-wire segments. Optional all-polypropylene brush segments are available.
- Brush-core removal is quick and easy. Motor and bearing separate from the brush core without having to disconnect any hydraulic hoses, eliminating the risk of oil spills or contamination.
- BR models use bolts for precise brush-contact adjustment; BP models incorporate a tool-free system for fast, easy adjustment.
- Adjustable baffle on BP models increases hopper capacity by 22 percent, for greater sweeping impact in each pass.
- Heavy-duty, high-torque, bidirectional motor is coupled to the brush core through a 2.5-inch hex hub. Motor and bearing are protected within the broom-frame structure.
- Replaceable bolt-on cutting edges are standard on hopper bins. BP models feature a 0.5-inch single-bevel cutting edge; BR models have a 0.625-inch double-bevel cutting edge.
- Front caster wheel on BP models allows the brush to follow ground contours. Front bumper on BR models provides extra strength and protection when sweeping close to walls or obstacles.
- Optional 20-inch gutter brush with wire bristles can be mounted on the right or left side of the broom for collecting material close to curbs.
- Optional 25-gallon broom-mounted or 30-gallon roof-mounted water-tank kits are available for dust-suppression applications.
- These pick-up brooms are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with many competitive models.

BUCKETS

CONSTRUCTION | DIRT | FOUNDRY | GRADING HEEL |
LIGHT MATERIAL | TOOTH | UTILITY

SPECIFICATIONS

- John Deere buckets have significantly greater capacities than many competitive buckets, enabling them to carry and do more. They capably take advantage of the steep dump angles and high bucket rollbacks of G-Series Skid Steers and Compact Track Loaders. They also enhance the performance of many competitive models.
- Construction bucket:** Offers a low-profile backplate for better operator visibility to the cutting edge and a rounded interior for excellent fill-and-dump performance. This design provides maximum visibility and reach as well as lower breakout forces versus shorter dirt or grading buckets.
- Foundry bucket:** Easily move and dump gravel, mulch, manure, brush, or dirt.
- Foundry bucket:** Is shorter from bucket heel to cutting edge, to provide maximum breakout force for tough digging conditions. Bolt-on toothbar holes are predrilled.
- Grading-heel bucket:** Featuring a smooth bottom free of lifts or edges, this bucket is ideal for land shaping; dirt leveling; and installation of new landscape for sodding, irrigation, and drainage.
- Light-material bucket:** Is designed for handling woodchips, sawdust, snow, grain, fertilizer, or a myriad of loosely compacted low-density materials.
- Tooth bucket:** Is made especially for loosening compacted soil or grubbing out rocks. Unlike one with a toothbar kit added, this bucket offers a flat bottom, making it an excellent tool for back-dragging.
- Utility bucket:** Is perfect for light, high-volume materials. Bolt-on cutting edge holes are predrilled.

MULTIPURPOSE BUCKETS

MP66B | MP72B | MP78B | MP84B

SPECIFICATIONS

- Capable of bulldozing, scraping, loading, metering, and clamping material, John Deere multipurpose buckets are ideal for a wide variety of applications.
- Rugged torque tube equalizes load forces when clamping.
- To further increase durability and performance, buckets are predrilled to accommodate optional bolt-on replaceable cutting edges, toothbars, side cutters, and spill guards.
- Heavy-duty design includes tough high-carbon cutting edges, wear-resistant 1055 high-carbon steel at key wear points, and precision cylinders with easy-to-service hardened rods. All pivot points are lubricated with grease fittings.
- Low-profile geometry allows outstanding visibility to the cutting edge, increasing efficiency.
- These multipurpose buckets are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with many competitive models.

ROCK BUCKETS

R66 | R75 | R84

SPECIFICATIONS

- Rock buckets are ideal for sifting and sorting material, clearing stone from farm fields, and removing debris from jobsites. Buckets retain rock and debris while digging.
- Tine tips are fully gusseted on both sides for added durability and dependability, and are interconnected for increased strength.
- These rock buckets are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with many competitive models.

ROLLOUT BUCKETS

RB72 | RB84 | RB96

SPECIFICATIONS

- Quality-manufactured John Deere rollout buckets feature an open design that enables quick, clean, and easy material loading.
- Available in a range of three sizes, rollout buckets are ideal for achieving elevated dump heights in high-capacity applications, including construction, forestry, agriculture, demolition, recycling, and land management.
- Each model comes standard with a universal bolt-on cutting edge that is double beveled and reversible, for extended wear life.
- Industrial-strength, high-pressure cylinders are cushioned for smooth bucket operation and are constructed with induction-hardened, double chrome-plated rods, for maximum durability.
- These rollout buckets are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with many competitive models.

COLD PLANERS

CP18G | CP24G | CP30G | CP40G

SPECIFICATIONS

- John Deere has paired proven expertise in compact equipment with Wirtgen Group, the market leader in milling machines and cutting technology, to deliver this new lineup of customer-inspired cold planers.
- Compact housing enables milling closer to obstacles. Enhanced side-plate design with bolt-on extenders helps efficiently manage debris.
- All models can slide horizontally from left to right, for ultra-capable control. Easy pick replacement boosts uptime.
- Exclusive Tilt-Float/Tilt-Lock feature makes these cold planers ideal for everything from repairing parking lots to cleaning around larger milling machines.
- Standard tilt indicator in the middle of the cold planer as well as stationary depth-indicator arrows and red-marker indicators on both sides of the attachment increase performance around obstacles like manhole covers.
- Outstanding zero-edge measurement of 2 inches enables precision milling next to curbs and guardrails.
- Side plates made of wear-resistant skid material pivot to follow the ground profile.
- Impact-resistant front spillage guard is automated to lift and lower based on depth setting, reducing spillage of milled asphalt and simplifying jobsite cleanup.
- Optional pressure gauge displays power consumption in real time, to prevent stalling and loss of productivity.
- These cold planers are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs).

DOZER BLADES

DB84 | DB96

SPECIFICATIONS

- Add a John Deere dozer blade to turn your skid steer loader (SSL) or compact track loader (CTL) into a compact bulldozer.
- There's nothing light duty about these dozer blades. Their rugged design delivers maximum uptime to a wide variety of tasks — from stripping clay to finish grading.
- Quik-Tatch™-mounted blade comes standard equipped with reversible cutting edge and skid shoes for long-term durability.
- Power-angle-tilt lets you make blade adjustments on the go, for increased versatility and maximum productivity.
- These dozer blades are optimized to work with John Deere SSLs and CTLs. They are also compatible with many competitive models.

	DB84	DB96
Weight	703 kg (1,550 lb.)	737 kg (1,625 lb.)

ENGCON® TILTROTATORS

EC204 | EC206

SPECIFICATIONS

- With the engcon automatic coupler and tiltrotator system, operators can rotate attachments 360 degrees and tilt them up to 45 degrees side to side. Having the ability to rotate and tilt the attachment boosts versatility and precision when undermining existing utilities. Being able to grade and backfill complex contours also reduces manual labor for landscapers and site developers.
- For maximum breakout force or when lifting, the operator can simply disconnect the tiltrotator via the automatic quick-coupler, then reconnect it to backfill, maximizing versatility.
- These engcon tiltrotators are optimized to work with John Deere compact excavators (CEXs). They are also compatible with many competitive models

ROCK GRAPPLES

GR66B | GR72B | GR78B | GR84B

SPECIFICATIONS

- Rock grapples are designed to be a multipurpose tool for land clearing, brush-removal applications, and jobsite cleanup.
- Cylinder size of 2.5-inch bore diameter and 1.4-inch rod diameter delivers high grapple forces to tackle even the most difficult materials. Grapple arms feature integrated mechanical stop to reduce cylinder load when open.
- Durable 90-degree quick-couplers on the hydraulic cylinder hoses eliminate interference with the grapple. Standard low-profile cylinder guards simplify hose connections.
- 24.4-inch-wide grapple arm and grapple stances of 60.6 inches on the GR66B and GR72B and 65.3 inches on the GR78B and GR84B help grasp broad, cumbersome loads. Independent-action grapples enable different-sized objects to be picked up with each grapple.
- Solid backplate along the Quik-Tatch™ area protects hydraulic cylinder hoses and the machine from debris and damage. Thickened side cutter, side sheet, and backplate combine with large torque tubes for heavy-duty construction that meets the most demanding applications.
- Tines are spaced three inches apart and fully supported on each side for maximum bend resistance. Weld-in serrated cutting edge easily penetrates difficult ground conditions.
- These rock grapples are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with most competitive models.

SCRAP GRAPPLES

GS66B | GS72B | GS78B | GS84B

SPECIFICATIONS

- Scrap grapples are designed for scrap-handling, recycling-center, disaster-cleanup, and jobsite-cleanup applications that require grappling power to handle material.
- Durable 90-degree quick-couplers on the hydraulic cylinder hoses eliminate interference with the grapple. Standard low-profile cylinder guards simplify hose connections.
- Cylinder size of 2.5-inch bore diameter and 1.4-inch rod diameter delivers high grapple forces to tackle even the most difficult materials. Grapple arms feature integrated mechanical stop to reduce cylinder load when open.
- Open sides with bolt-on side plates allow easy grappling of material that is wider than the bucket. Cutting edges include predrilled holes for the convenient replacement of optional bolt-on edges.
- 24.4-inch-wide grapple arm and grapple stances of 60.6 inches on the GS66B and GS72B and 65.3 inches on the GS78B and GS84B help grasp broad, cumbersome loads. Independent-action grapples enable different-sized objects to be picked up with each grapple.
- Thickened side cutter, side sheet, and backplate combine with large torque tubes for heavy-duty construction that meets the most demanding applications.
- These scrap grapples are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with most competitive models.

HYDRAULIC HAMMERS

HH20C | HH40C | HH60C | HH80C

SPECIFICATIONS

- These are the fastest hydraulic hammers on the market, with 30-percent fewer parts than either competitive or previous models, for simplified maintenance.
- Redesigned to provide two to three times more blows per minute (BPM) than previous models, for increased efficiency.
- Exclusive tool retention enables quick installation and removal using only one small screwdriver.
- Bits* available to power your productivity include:
 - Standard **moil point** suitable for breaking concrete or medium-hard, non-stratified rock.
 - Optional **chisel point** for most concrete flatwork, walls around rebar, or breaking into a precut line.
 - Optional **spade**, available in two sizes, for most concrete and all earthworks in soft, non-stratified rock.
 - Optional **compacting plate** for single-machine prep of dirt for concrete pads and fencing.
- Optional **pyramid point**[†] used to break hard, reinforced concrete as well as sediment.
- These hydraulic hammers are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact excavators (CEXs). They're also compatible with most competitive models.

**All bits are unique to this hydraulic hammer. All older bits will not be compatible.*

[†]HH20C and HH40C only.

LEVEL BEST® BOX BLADES

PD72 | PD84 | PD96

SPECIFICATIONS

- These box blades are 2D or 3D Topcon grade-control ready.
- Push-pull design moves the material for fine grading.
- Two cylinders provide cross-slope operation.
- All cutting edges are reversible.
- Convex mirror allows material visibility.
- Foam-filled tires pivot on an oscillating axle.
- These Level Best box blades are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with most competitive models.

	PD72	PD84	PD96
Weight	915 kg (2,020 lb.)	940 kg (2,070 lb.)	980 kg (2,155 lb.)

MULCHING HEADS

ME36 | ME50

SPECIFICATIONS

- These mulchers are perfect for right-of-way maintenance, fire/fuel reduction, and clearing standing or felled trees and brush along fencerows, roadsides, waterways, and places that could otherwise be difficult to reach.
- Rotor and knife configuration cuts quickly, delivering better fuel economy by processing efficiently with less horsepower.
- Split ring rotor design helps protect cutting tools from damaging impacts while working.
- Cubit knife-style teeth are easily flipped to create a brand-new cutting edge, doubling tool life.
- Single-bolt tool fastening is secure and easily serviced from rear of tool holder.
- Teeth may be sharpened, further increasing usable life.
- These mulching heads are optimized to work with John Deere compact excavators (CEXs) and mid-size excavators. They're also compatible with most competitive models.

MULCHING HEADS

SM60 | MH60D | MH72D | MK76

SPECIFICATIONS

SM60:

- Standard-flow SM60 clears land and mulches material up to 5 inches in diameter on a mid-frame machine under 75 horsepower.
- The SM60 is equipped with a 15-inch depth-control rotor

MK76:

- Featuring depth-control rotor configuration, compact new MK76 clears stringy, dense, and stubborn vegetation in a minimum of passes.
- Quick rotor spool-up time boosts uptime.
- Replaceable cutting teeth, bolt-on shear bar, and wear liner help maintain peak performance and attachment life.
- Adjustable pin-on push bar guides material into the cutting chamber instead of rolling over the body of the mulching head.

MH60D and MH72D:

- The MH60D and new MH72D efficiently remove trees up to 8 inches, chew stumps up to 12 inches, and shred underbrush and woody materials into usable mulch in minutes.
- Two-speed hydraulic system optimizes available horsepower. When preset pressure level is attained, the motor automatically shifts to a higher displacement, increasing torque for reduced stalling and faster rotor-speed recovery time.
- Double-carbide-tipped teeth take big bites out of trees and chew stumps below ground level. When equipped, knife tools allow smoother cutting and finer chip size.
- High-capacity smooth rotor is designed to reduce material drag and horsepower requirements. Oversized sealed rotor bearings deliver long-term durability.
- The MH60D is also available with an optional depth-control rotor.

- Redesigned mulching chamber enables more efficient material flow and reduces wear points. Internal counter combs help create finer mulch
- Prominently positioned pressure gauge lets operators easily monitor hydraulic operating pressure.
- Heavy-duty push bar topples trees or brush and helps protect the carrier. Three-position adjustable push bar increases versatility and visibility.
- Heavy-duty mulching door traps material in mulching chamber for finer processing. Door cylinder inside frame body is protected from damage.
- Enhanced frame construction and bolt-on skid shoes reduce debris buildup and extend wear life.
- These mulching heads are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with most competitive models.

NURSERY FORKS

NF44

SPECIFICATIONS

- Easily and effortlessly transport balled and burlapped trees or container stock up to 44 inches in diameter as well as large rocks and light boulders.
- Third-function hydraulic-actuated arm that swings open and closed works in conjunction with stationary arm to pick up a variety of objects.
- Six-inch tread plate allows the arms to firmly grasp root balls, nursery pots, container boxes, or landscape rocks.
- Versatile Quik-Tatch™ system enables hook-up and release in only seconds.
- Clean, simple tine design provides virtually unrestricted visibility forward and to the sides.
- These nursery forks are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with many competitive models.

Hydraulic	12.7-mm (0.5 in.) quick-connect couplers
Electrical	None
Vehicle Compatibility*	316GR, 318G, 320G, 324G, 330G, and 330 P-Tier SSLs; 317G, 325G, 331G, 331 P-Tier, 333G, and 333 P-Tier CTLs; 184 G-Tier†, 204 G-Tier†, 244 P-Tier†, 304 G-Tier†, and 324 P-Tier† CWLs

*Ride control recommended.

†Requires skid-steer-style Quik-Tatch coupler for operation.

Pressure-Control Kit AT460780 available as a dealer-installed option reduces the risk of damage to the tree ball or container by limiting hydraulic-cylinder pressure. If caution is used when clamping objects, this kit is not required.

PALLET FORKS

P45 | P60 | SEVERE DUTY

SPECIFICATIONS

- Pallet forks are available in lengths of 42, 48, and 60 inches check specifications below for vehicle compatibility).
- Skid-resistant steps on both sides of the pallet-fork frame ease vehicle entrance and exit.
- Single-piece backrest is available on P45 and P60 options. Severe-duty skid steer loader option includes a walk-through backrest with a bolt-on option.
- Severe-duty pallet forks offer increased capacity and durability over the previous fork-frame design.
- Brick-guard design provides strength and smooth surfaces, for protection against load damage.
- Design enables excellent visibility, and P45 and P60 standard frames include load-securing "D" ring.
- Quik-Tatch™ system allows easy attachment hook-up in seconds.
- These pallet forks are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They are compatible with most competitive models.

PLATE COMPACTORS

PC4 | PC7 | PC10

SPECIFICATIONS

- Designed specifically for trench-, slope-, and excavation-compaction applications.
- Large eccentric weight offset from motor shaft helps provide high-impulse force, resulting in improved compaction rates.
- Hydraulic motor bearings use oil-splash lubrication, and sealed eccentric bearings provide maintenance-free operation.
- Eccentric housing design encloses and protects the motor.
- These plate compactors are optimized to work with John Deere compact excavators (CEXs) and backhoe loaders (BHLs). They're also compatible with most competitive models.

	PC4	PC7	PC10
Impulse Force	17.8 kN (4,000 lbf)	28.5 kN (6,400 lbf)	35.6 kN (8,000 lbf)
Cycles/Minute at Regulated Flow	2,000 rpm	2,000 rpm	2,000 rpm
Baseplate Dimensions	330 x 635 mm (13 x 25 in.)	460 x 700 mm (18 x 27.5 in.)	610 x 710 mm (24 x 28 in.)
Compaction Area	209 550 mm ² (325 sq. in.)	322 000 mm ² (499 sq. in.)	433 100 mm ² (671 sq. in.)
Hydraulic-Flow Range	34–53 L/min. (9–14 gpm)	57–76 L/min. (15–20 gpm)	76–91 L/min. (20–24 gpm)
Regulated Flow	34 L/min. (9 gpm)	68 L/min. (18 gpm)	79 L/min. (21 gpm)
Operating Pressure	17 930 kPa (2,600 psi)	13 790 kPa (2,000 psi)	13 790 kPa (2,000 psi)
Pressure-Relief Setting	20 680 kPa (3,000 psi)	15 170 kPa (2,200 psi)	15 170 kPa (2,200 psi)
Weight*	180 kg (397 lb.)	272 kg (600 lb.)	403 kg (888 lb.)
Length	780 mm (30.7 in.)	890 mm (35.0 in.)	940 mm (37.0 in.)
Width	330 mm (13.0 in.)	460 mm (18.1 in.)	610 mm (24.0 in.)
Height*	515 mm (20.3 in.)	546 mm (21.5 in.)	648 mm (25.5 in.)
Vehicle Compatibility	26 P-Tier, 30 P-Tier, and 35 P-Tier CEXs	50 P-Tier and 60 P-Tier CEXs	60 P-Tier CEX; 310 G-Tier, 310 P-Tier, 320 P-Tier, and 410 P-Tier BHLs

*Without mounting adapter — requires respective machine-mounting adapter.

POWER RAKES

PR60 | PR72B | PR84B | PR96B

SPECIFICATIONS

- John Deere power rakes are perfect for landscape tasks such as seedbed preparation, rock raking, site development, and more.
- Adjustable end plates enable the power rake for double duty as a box scraper, trapping and gathering stones for piling and pickup.
- Long-life carbide teeth on the roller dig, lift, and pulverize dirt.
- Heavy-duty drive chain is housed in a sealed oil bath to reduce maintenance.
- Power rake roller assemblies can rotate 20 degrees from center in either direction, allowing material to be moved left or right (requires 12-volt kit).
- Forward and backward raking capability halves the time required for seedbed preparation.
- These power rakes are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're compatible with most competitive models.

	PR60	PR72B	PR84B	PR96B

ROOT RAKES

RR72 | RR78 | RR84

SPECIFICATIONS

- Designed specifically for land clearing, ground leveling, and moving materials away from buildings and obstructions more quickly and economically than dozer blades.
- Handily gather rocks and debris while allowing soil to sift through, for minimal site and landscape disturbance.
- Alloy-steel construction, replaceable pin-on teeth, and zinc-plated greaseable pivot pins with protected zerks and hardened-steel bushings ruggedly resist impact.
- Attachment height and width help shield the front of the machine against large piles of brush or jagged scrap.
- Weld-on “D” ring enables the tackling of a wide variety of jobsite tasks.
- These root rakes are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They’re also compatible with many competitive models.

ROTARY CUTTERS

RE40 | RE50

SPECIFICATIONS

- The RE-model rotary cutters use three swinging blades mounted to a blade carrier to maximize cutting performance.
- They're able to fell and cut material up to six inches in diameter. Directionally beveled blades push material into the head of the cutter, creating finer debris for easier recycling.
- Blades are reversible, so when the leading edge wears, the blades can be unbolted and flipped over to expose a fresh cutting edge.
- Heavy-duty hinged debris shield retracts when the head is engaged with trees and brush, exposing the blades and allowing for aggressive cuts.
- Automatic hydraulic braking quickly stops blade rotation after the machine is turned off, making it faster for operators to exit the cab.
- These rotary cutters are optimized to work with John Deere compact excavators (CEXs). They're also compatible with many competitive models.

	RE40	RE50
Width		
Overall	1340 mm (53 in.)	1590 mm (63 in.)
Cutting	1020 mm (40 in.)	1270 mm (50 in.)
Height	590 mm (23 in.)	600 mm (24 in.)
Length	1190 mm (47 in.)	1450 mm (57 in.)
Weight (not including mounting bracket)	300 kg (660 lb.)	480 kg (1,050 lb.)
Minimum Cutting Height	57 mm (2.25 in.)	57 mm (2.25 in.)
Cutting Capacity (maximum tree diameter)	102 mm (4 in.)	127 mm (5 in.)
Approved Carrier Weight Range	3000–5000 kg (6,614–11,023 lb.)	5000–8000 kg (11,023–17,636 lb.)
Number of Blades	3	3
Hydraulic Flow

ROTARY CUTTERS

RC60B / RC72B / RC78B / RS72 / RX72 / RX84

SPECIFICATIONS

- John Deere rotary cutters excel at clearing medium to heavy brush and hardwoods up to 10 inches in diameter.
- Direct-drive bearing delivers higher efficiency and extended durability.
- Hydraulic valve stops blades from spinning within seconds upon shutdown.
- Motor cover protects important components and connections from debris.
- On the RS72 model, four alternating bevel blades are made of 0.75-inch-thick high-grade steel in a reversible design, for a deep, self-clearing cut and long wear life. Heavy, flywheel-like blade carrier maintains inertia while cutting and enables mounting of optional stump-grinding carbide teeth.
- RS and RX models have a retractable forward shield that rolls back to expose blades to larger trees and falls closed for processing material and minimizing flying debris.
- On RX models, three single-bevel blades are made of 0.625-inch-thick forged steel for excellent cutting in most applications. Optimized blade-carrier design provides fast startup and recovery performance.
- Standard pressure gauge monitors blade load for ideal performance.
- These rotary cutters are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with many competitive models.

This blade-carrier style applies to RS72 only.

This blade-carrier style applies to both RX72 and RX84.

ROTARY TILLERS

RT52 | RT66

SPECIFICATIONS

- RT52 and RT66 till up to a six-inch depth. Rugged construction and heavy-duty tines provide long service life and excellent operation in all conditions.
- Offset to the right six inches, both models are ideal for close tilling beside walls and sidewalks. The RT66 can also be positioned in the center.
- Tillers require only standard hydraulic flow for high-quality performance.
- For increased efficiency, till in both forward and reverse directions.
- Optional scarifiers increase productivity in hard ground conditions.
- These rotary tillers are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with many competitive models.

	RT52	RT66

SNOW BLOWERS

SB72E | SB84E | SB72M | SB84M | SB84S

SPECIFICATIONS

- Optimized lineup of new John Deere snow blowers includes five models designed for applications ranging from normal to high and compacted accumulations:
 - Economical standard-flow SB72E and SP84E models are built to capably handle light to moderate snowfalls.
 - SB72M and SB84M feature high-flow hydraulic systems for efficient operation in deeper, more compact conditions.
 - The SB84S is designed for maximum productivity in high-flow, high-pressure applications, to tackle the deepest, most compacted sites including ice.
- Optional back-drag add-on kit enables snow removal close to walls, garage doors, or other structures:
 - Indicator arms located on both sides of the back drag are clearly visible from the seat of the cab to show operators how close they are to obstacles.
 - Backing out pulls snow away from objects through the snow blower, eliminating the need for manual-finish shoveling.
- Floating hitch with 3 degrees of flexibility allows for near-perfect float capability across uneven surfaces, for cleaner passes vertically, front, back, and tilted side to side.
- Optional and easily adjustable skid skis create greater downforce across the attachment to maintain consistent ground contact and maximum blower feed.
- These snow blowers are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They're also compatible with many competitive models.

SNOW PUSHERS

SP8C / SP10C

SPECIFICATIONS

- Quickly and efficiently remove large accumulations of snow from sidewalks, parking lots, and driveways.
- The C-Series enhance visibility and are a lighter weight compared to previous models.
- Rubber cutting edges are reversible and replaceable.
- Optional pullback edge is ideal for opening up confined areas and maneuvering around vehicles, buildings, fences, or other obstructions.
- These snow pushers are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They are also compatible with many competitive models.

	SP8C	SP10C
Path Width	2438 mm (96 in.)	3048 mm (120 in.)

SNOW/UTILITY BLADES

BL6B / BL7B / BL8B / BL9B / BL10B

SPECIFICATIONS

- John Deere snow/utility blades provide additional productivity in snow removal and light dirt work.
- Blade angles hydraulically 30 degrees, right or left. Adjustable skid shoes are standard.
- Blade oscillates five degrees, right or left.
- Four trip springs help protect the vehicle from sudden impacts with obstacles when blading snow. Trip springs can be locked out for light grading and dirt work.
- Bolt-on replaceable six-inch edge is 0.5-inches thick. Available rubber cutting edges prevent damage to decorative surfaces.
- Blade height is 28 inches; an 8-inch full-length extension is available.
- These blades are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They are also compatible with many competitive models.

SNOW/UTILITY V-BLADES

BV6 / BV8 / BV9

SPECIFICATIONS

- John Deere snow/utility V-blades provide multifunction versatility for snow removal and light dirt work.
- Blades angle hydraulically to four positions: **straight** for larger cuts, **V-configuration** for pushing through hard pack, **scoop** (both sides inward) for easy snow stacking, and **30 degrees right or left**.
- Steel cutting edge is standard. Available rubber cutting edge helps prevent damage to decorative surfaces.
- Adjustable skid shoes for vertical blade productivity are standard.
- Trip springs help protect the vehicle from sudden impacts with concealed obstacles and can be locked out for light grading and dirt work.
- Electrohydraulic (EH) valve for independent blade function is adjustable from the cab.*
- Top blade extension for extra carrying capacity is available.
- These V-blades are optimized to work with John Deere skid steer loaders (SSLs), compact track loaders (CTLs), and compact wheel loaders (CWLs). They are also compatible with many competitive models. See your dealer for details on attachment-control kits if not ordered as a factory-installed option.

*SSLs, CTLs, and CWLs require 1/2-inch auxiliary couplers and a 14-pin electrical connector for blade operation.

STEEL TRACKS

10 IN. / 12 IN. / 14 IN.

SPECIFICATIONS

- These steel tracks enable John Deere skid steer loaders (SSLs) to operate in soft, muddy, loose conditions while also improving traction over hard ground and gravel.
- Design reduces ground pressure while adding counterbalance weight.
- Sloped link casting helps eject material that could interfere with movement.
- Tracks protect tires from damage inflicted by harsh terrain and help prolong tread life.
- 1.25-inch heavy-duty bushings and drilled (not cored) holes increase strength.
- Open outer side plates make tracks easy to clean and adjust.
- These steel tracks are optimized to work with John Deere SSLs. They are also compatible with many competitive models.

HIGH-TORQUE STUMP SHREDDER

SS30

SPECIFICATIONS

- Remove stumps from 8 to 28 inches in diameter in a single pass. Easily remove larger stumps with multiple bores.
- Hardened pilot cone draws auger into the stump while 0.75-inch-thick AR500 steel blades efficiently make the cut.
- Low-speed, high-torque auger planetary drive shreds material more safely and without the dangerous flying debris of conventional stump grinders.
- Bore 20 inches into the ground to remove feeder roots.
- Even with slower operating speeds, stump removal is faster than with conventional stump grinders. Site cleanup is easy thanks to the small, contained chip pile.
- No carbide tools to replace lowers operating costs, and maintenance required only every 1,000 stumps maximizes uptime.
- This stump shredder is optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). It's also compatible with most competitive models.

SS30	
Weight	590 kg (1,300 lb.)

TRENCHERS

TC36 | TC48 | TR36B | TR48B | TR60B

SPECIFICATIONS

- TC models are ideal for lower-duty cycles in agriculture or light-construction applications. Low-profile chain and sprocket drive feature a standard-flow hydraulic motor.
- TR models are designed for higher-duty cycles in commercial or heavy-construction applications. Heavy-duty planetary-drive design leverages greater hydraulic horsepower from high-flow hydraulics.
- Convenient, two-position manual side shift enables trenching close to structures.
- Built-in skid shoe and indicators help maintain digging control.
- Spring-loaded boom reduces shocks to the hydraulic motor, machine, and operator.
- Trencher design eases entrance and exit from the operator's station.
- Standard heavy-duty crumber removes loose soil, for increased productivity.
- Optional chain width and tooth configurations are available.
- These trenchers are optimized to work with John Deere skid steer loaders (SSLs) and compact track loaders (CTLs). They're also compatible with many competitive models.

VIBRATORY ROLLERS

VR66C | VR73C | VR84C

SPECIFICATIONS

- John Deere vibratory rollers turn a skid steer loader (SSL), compact track loader (CTL), or compact wheel loader (CWL) into a powerful compactor. Ideal for asphalt patch, foundation, trench, and flatwork compaction, they're very economical since owning one eliminates the costs and maintenance of a self-propelled roller.
- Bidirectional operation increases productivity.
- Powered by standard hydraulics, vibratory rollers produce compaction forces up to 9,370 lbf.
- With drum oscillation of ± 15 degrees, these attachments are easy to maneuver.
- Quik-Tatch™ compatible, they take only one minute to hook up.
- Drum and shaft bearings are lubricated and cooled in oil bath for long life.
- These vibratory rollers are optimized to work with Deere SSLs, CTLs, and CWLs. They are also compatible with many competitive models.
