

Operations Center provides simple but powerful management tools that enable access to data anytime, anywhere through the web, tablet, or phone.

Summary:

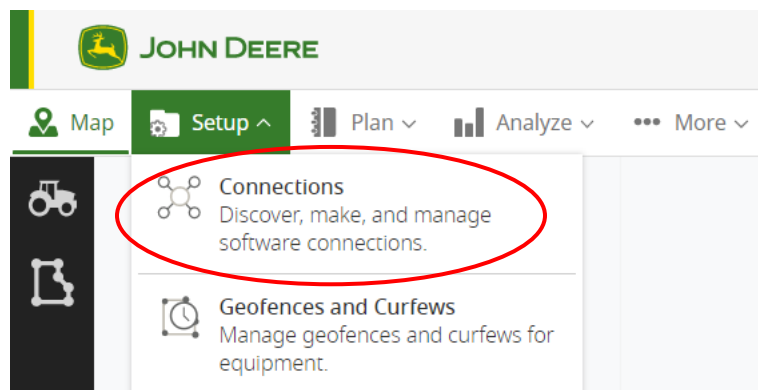

- Setup automatic data flow into your Operations Center organization from Climate FieldView and Raven Slingshot

Detailed release notes:

Setup automatic data flow into your Operations Center organization from Climate FieldView and Raven Slingshot

It is easier than ever to quickly bring data from another farm management software into the John Deere Operations Center™ making it the primary tool needed for farm data management.

You can now connect your Operations Center account with Raven Slingshot and Climate FieldView for automatic data sharing with Operations Center. You can connect with Raven Slingshot and Climate FieldView in the Connections tool so you can bring data into Operations Center automatically. The Connections tool can be found under the Setup tab in Operations Center.

To connect to Climate FieldView

1. Click connect on the Climate FieldView Data Retrieval card in Connections.
2. Enter log in credentials in Climate FieldView and select connect
3. Enter the work type and date representing how much historical data to retrieve and save.
4. New agronomic data from your FieldView account will be pulled into your Operations Center account.

John Deere
Data Retrieval from Climate FieldView

Bring your FieldView work (agronomic) data into the John Deere Operations Center™ to manage your operation in one place.

John Deere
Data Retrieval from Climate FieldView

Description

Bring your FieldView work (agronomic) data into the John Deere Operations Center™ to manage your operation in one place. Harness the full power of John Deere Operations Center by connecting your FieldView account. Built by John Deere, the FieldView Data Retrieval connection allows you to focus on farming and not on transferring data manually.

- All information will be accessible in Operations Center to analyze, edit, and plan in one place
- Data Retrieval pulls work data from FieldView into Operations Center daily
- Move historical work data from FieldView into Operations Center by selecting a retrieval start date

Set up your FieldView Data Retrieval connection today to increase efficiency and productivity!

Connect with Data Retrieval from Climate FieldView

Select work types to retrieve from Data Retrieval from Climate FieldView to bring into your Operations Center organization. If you would like to have historic data come in for specified work types, please select a retrieval start date as well.

Work Type	Data Retrieval Start Date
Seeding	Jul 8, 2020 no greater than 10 years in the past
Work Type	Data Retrieval Start Date
Application	Jul 8, 2020 no greater than 10 years in the past
Work Type	Data Retrieval Start Date
Harvest	Jul 8, 2020 no greater than 10 years in the past

Warning

Data Retrieval from Climate FieldView tracks products applied differently than Operations Center. It may be necessary to reconcile products applied by editing work data after retrieval has completed.

Work Data editing can be done in Operations Center or Operations Center Mobile.
