

959M TRACKED FELLER BUNCHER

JOHN DEERE

959M TRACKED FELLER BUNCHER

OUT HERE, ORDINARY DOESN'T CUT IT.

Work can be demanding in your neck of the woods. That's why we rely on real-world insights from customers like you to tell us what you need to succeed. A long and wide undercarriage for singular stability. Powerful standard boom with high lift capacity for the most challenging applications. Dual-swing drive for productivity-boosting power. Expansive visibility. A large fuel tank to keep running — and producing — longer. And a heavy-duty John Deere PowerTech™ Plus 9.0L diesel engine that delivers low total fluid consumption and high dependability. This machine was built to tackle your most difficult tasks.

Sure-footed stability

Reliable tractive effort enables maneuverable negotiation of difficult or steep terrain, deep snow, and swamps. Long and wide undercarriage combined with our industry-leading leveling system maximizes stability on steep slopes and other challenging terrain conditions.

Work within reach

Standard boom reach of 8.9 meters (29 feet 4 inches) helps minimize the machine movements needed to get things done. Adding any of a variety of available large-capacity attachments with up to 686-millimeter (27 inch) cut capacity on the new FR27 felling head further increases boom versatility.

Rapid Cycle System (RCS)

Optional RCS can be tailored to individual skill levels and specific harvesting conditions, from large single-tree harvesting to high-speed, multi-stem cutting. Multiple RCS settings can be saved according to individual operator preferences.

OPTIONAL SLOPE-MONITORING SYSTEM EASES OPERATION

Level the playing field

An available option on the 959M Tracked Feller Buncher, our industry-leading slope-monitoring system measures the actual ground-slope angle the machine is working on and displays it on the in-cab monitor, for more confident operation in tough steep-slope conditions and potentially greater overall efficiency.

Simplified service

Convenient access to service components helps simplify daily checks and preventative-maintenance tasks, so they get done on schedule, minimizing costly repairs down the road.

Get a handle on it

Optional undercarriage-mounted toolbox provides convenient storage for tools, saw teeth, extra saw bars, and other spare parts, eliminating trips back to the service truck.

PUT TECHNOLOGY TO WORK IN THE WOODS AND AT THE OFFICE.

Coordinate your operation and your team's productivity from wherever your work takes you with John Deere Precision Forestry and our core technology solutions.

FEATURES

Core intelligence

Your John Deere Forestry machine arrives from the factory equipped with a powerful set of technologies and capabilities already built in. Each plays an important role in managing the health and performance of your overall equipment fleet:

- **JDLink™ connectivity** lets you track your equipment, see which machines are working, and know if they're being utilized properly and at maximum productivity and efficiency.
- Enabled through JDLink, **John Deere Connected Support** leverages a suite of dealer and factory tools designed to deliver increased uptime and productivity, and lower daily operating costs.
- **Remote Diagnostics and Programming Capability** within John Deere Connected Support helps your dealer warn you of any issue with your machine — often before you know of the problem yourself — and initiate solutions without charging you for a technician's visit to your jobsite.
- Our advanced dual approach to **Machine Health** combines the expertise of the technology specialists at our dealerships with the data specialists at our central Machine Health Monitoring Center (MHMC). As part of John Deere Connected Support, information from thousands of connected machines flows through the MHMC, enabling our specialists to identify trends and develop new and improved preventative-maintenance and repair protocols.

Precision Forestry

Take the guesswork out of planning, implementing, and monitoring your logging operation. The tools of our production-planning and -tracking system expand on the core technology features that come standard in every John Deere Forestry machine to unleash a powerful new array of possibilities:

- **TimberMatic™ Maps** is an innovative onboard software solution that helps you reimagine your jobsites. Real-time production views, optimized routes, and shared wireless connections between machines make it easier than ever before to take your forestry operation to the next level.
- **TimberManager™** is a web-based solution for PCs, tablets, and mobile phones that allows you to follow jobsite progress. Combined with TimberMatic Maps, this software provides complete visibility of your operation — from land harvested to specific machines — so you can streamline communication, analyze tasks, and increase productivity:
 - **Remote Monitoring** keeps tabs on the health and performance of your fleet from wherever you are.
 - **Precise Progress Tracking** lets you set goals for your team to meet throughout the day.
 - **Live Production View** displays progress including tree count, area harvested, and estimated tonnage.
 - **Simplified Mapping** of machine data and GPS-based location tracking shows precise stem and log counts.
 - **Real-Time Updates** let you adjust course or eliminate tasks if needed to maintain steady workflow.
 - **Fleet Optimization** goes beyond machine management to help improve the efficiency of your business.

**JOHN DEERE
CONNECTED SUPPORT™**

CONNECTS YOUR OPERATION
TO DEALER & FACTORY EXPERTISE

FR27

Powerful productivity

Its 686-millimeter (27 inch) single-cut capacity makes the FR27 our largest-cut-capacity felling head. Over 16-percent bigger than the FR24B, the massive 0.70-square-meter (7.5 square foot) accumulation area of the FR27 enables efficient handling of a single large tree or multiple smaller stems. With long harvesting arms, hardened-steel saw housing, and large side-chip exhaust chute, the productive, durable, and maintenance-friendly FR27 is available as a standard attachment on the 959M Tracked Feller Buncher.

FIND YOUR FELLING HEAD AND CUT TO THE BOTTOM LINE

Designed to run on swing-to-tree tracked feller bunchers like the 959M, these flexible felling heads can more than capably help you take it on.

TIT
LINE.

FELLING HEADS

Well within your reach

From small stems to big timber, softwood to hardwood, level or sloped ground, John Deere has a disk saw felling head that's designed for your job.

Robust flexibility

Available in both limited and high rotation, the **FS22B** and **FR22B** are our most versatile felling heads. They're robust enough to handle larger, mature trees, with the tree-handling performance to also efficiently accumulate mid-sized timber.

Proven reliability

Delivering efficient, multi-stem high-accumulation performance with huge pocket and tall horns, and available in both limited and high-rotation wrist, **FS50** and **FR50** felling heads are best suited for first and second thinnings as well as high-production plantation harvests.

Choose the correct felling head for your 959M Tracked Feller Buncher.
