

Application Controller 1100/1120 (S.N. PCXL01C201000-)

New Features:

- Active Implement Guidance support for GREEN FIT configured machines

Resolved Items:

- Distance Trip spacing rounding to the nearest millimeter when using English distance units caused trip location bias after large numbers of trips.
- High CAN Bus load communication error momentarily seen on screen
- iGrade quarter screen run page did not show elevation offset during plane control operation
- Demo activation expiration date calculation
