## **Getting Started Steps**

The following steps are to be used for setting up the John Deere Field Connect website prior to hardware installation. To successfully setup the website the field site and management zone should already be selected. The probe and gateway should already be ordered. John Deere recommends setting up the website prior to installing the hardware in the field.

- A. Determine location of probe
- B. Determine Probe length
- C. Log in to John Deere Field Connect using Dealer Login info
- D. Add Organization
- E. Transfer Gateway/Probe (need to be logged into dealer organization)
- F. Login to Customer Organization
- G. Add Field
- H. Add Management Zone
- I. Add People
- J. Install Hardware Follow John Deere Field Connect Installation Instructions

#### A. Determine Location of Probe

Determining the proper location of the probe within a management zone is an important step. John Deere recommends consulting a trusted agronomic advisor for the proper placement of the probe. The graph below contains some considerations to think about when selecting the probe location:

Aspects	Considerations
Growers Perspective	What part of the field does the grower currently use to make water management decisions?
Soil Survey Maps	Consult with the appropriate governmental organization to obtain these maps.
Field	Cropping practices, soil types, depth of soil, size of management unit, irrigation approach, grid or zone nutrient sampling

### **B. Determine Probe Length**

Use the graph below as a guideline to determine which probe to use. Soil type at the location of where the probe is going to be installed is another factor to consider. Consult your trusted agronomic advisor for more assistance.

<b>Rooting Profile</b>	Сгор Туре	Proposed System
Shallow-rooted	Vegetables, strawberries	0.5 m/1.64ft
Fibrous-rooted	Broad-acre crops, other berries, larger vegetables, various trees, vines, cotton, corn, sugar beets	1.0 m/3.28ft
Deep-rooted	Tree fruits, nut crops	1.5 m/4.92ft

### C. Log in to John Deere Field Connect using Dealer Login info

Dealer Logs into John Deere Field Connect website using RACF ID (Dealer User ID and Password).

### D. Add Organization

If the customer already has a JDLink organization created, a John Deere Field Connect organization will already exist, skip to step E.

- 1. Go to the Assets tab.
- 2. Select the + button next to Add Organization.

Add Organization	8

The link in the e-mail will ask you to login to an existing John Deere Field Connect user ID or create a user ID.

5. Login with the user ID to Accept Invitation - Typically the customer would login at this time to accept the invitation.

#### E. Transfer Gateway/Probe (need to be logged into dealer organization)

- 1. Go to the Assets Tab.
- 2. Select Hardware.
- 3. Select the Gateway or Probe to be transferred.

	Q	×		٩	×
Gateways	Attachments		Probes	Attached to	
32014		^	120203	32012	^
G20000000002     G2000000002     G20000000002     G20000000000	P20000000002		120204	32012	
G2000000008	P20000000008		120205	32012	E

4. After selecting a Gateway or Probe, the Transfer button towards the top of the page will highlight in yellow and be active.

5. Press the Transfer button.

Who would you like to transfer this hardware to?         Please enter an email address for an organization or organization member.         Enter Email         Select the type of transfer	
Enter Email Select the type of transfer	
Select the type of transfer	
C Lease Sale	
Hardware:	
G2000000002 (GATEWAY) 🗱	

- 6. Enter the e-mail address of a member in the organization the Gateway or Probe is being transferred to.
- 7. Select whether this is a Lease or Sale.
- 8. Verify the correct Gateway and/or Probe is selected. If the wrong hardware is selected you can remove the hardware by pressing the X next to the hardware name.
- 9. Press the Transfer Now button.

The e-mail address identified in the above steps will receive the following e-mail.

# Field Connect - Hardware Transfer

Field Connect hardware(s) has been transferred to your organization in the Field Connect system. In order to complete the transfer, please use link below:

#### Complete Hardware Transfer

At this location you may sign in with your John Deere username and password or create a username in the event you do not have one. After login, select the organization to which you want to transfer the hardware.

Thank you for using Field Connect!

10. Customer needs to login and accept the hardware transfer.

NOTE: Data gathered before hardware ownership transfer will not transfer to new owner.

#### F. Login to Customer Organization

The next steps need to be completed from the customer's account after the organization has been created and the hardware has been transferred. If the hardware is dealer owned then the steps can be completed in the dealership's organization.
