Operator and Mechanic Training

Operator training shall focus on the operation of equipment, daily inspections, as well as minor adjustments and shall be conducted at the location where the equipment is received. Mechanic training shall focus on the operations, routine/preventive maintenance and repair troubleshooting of equipment and shall be conducted at the organization's location that will be responsible for maintaining the equipment purchased. The contractor shall be notified of these locations at time that training is scheduled.

This training shall contain the following information:

TECHNICAL MANUALS
VEHICLE FAMILIARIZATION
ENGINE
TRANSMISSION
BRAKES AND AIR SUPPLY SYSTEM
BODY AND COMPONENTS
HYDRAULIC SYSTEMS
COMPLETE ELECTRICAL COMPONENTS
CALIBRATION SYSTEMS (if applicable)

Training objectives

Operator Training - At completion of training session the attending equipment operators shall be able to:

- Describe the operating capabilities and any special features present on the equipment.
- Identify all control devices to the equipment model.
- Describe the proper/safe techniques to use for transporting the equipment including loading and tie-down.

Use the Operator's Manual to identify:

- Special safety considerations including cautions and warnings applicable to the operation of the equipment.
- Manufacturer's recommended preventive maintenance service intervals and procedures including pre- and post-operational inspection and service requirements.

Demonstrate on the equipment:

- The ability to identify inspection and service points.
- Proper/safe start-up and shutdown procedures.

	<ul style="list-style-type: none"> - Proper/safe use of all controls. <p>Mechanic Training - At the completion of these training sessions, the attending technicians will be able to:</p> <ul style="list-style-type: none"> - Describe the primary equipment systems design features, function & capabilities. - Identify the primary equipment systems component location and function. - Use manufacturer’s reference literature and materials to identify: - Manufacturer’s Preventive Maintenance service intervals & procedures - Recommended system diagnostic procedures & repair processes - Representative component part numbers & nomenclature. <p>Demonstrate on the equipment, the use of specified diagnostic procedures and appropriate tools/devices to diagnose the most likely primary equipment system failures & describe the procedures that would be required to repair these failures.</p> <p>Dealer shall provide documentation signed by the user trained that all necessary elements were covered in training.</p>
Payment Remittance Information	Remit to Address: Deere & Company Ag & Turf CBD & Government Sales 21748 Network Place Chicago, IL 60673-1217
