

See what you've been missing. LED work lights from John Deere.

Light years ahead of halogen, HID and competitive brands.

See the light of day – at night – with LED work lights from John Deere. Proven to run cooler, last longer and cost less over the long haul than halogen and HID lights, John Deere LED work lights also boast of some the **highest effective lumen outputs** on the market. But there's more.

- Energy-efficient results for longer battery and alternator life
- Add lights without overloading electrical system
- Long life with no bulbs or ballasts to replace (40,000-hour rating)
- Directional light output
- Natural light – similar to sunlight – reduces eyestrain
