⁽⁴⁾ Source: Conservation Technology Information Center, as of June 2012. Based on over 30% crop residue after planting. 2006-2008 estimates based on 2004 national survey data adjusted for the counties that submitted updated information.

⁽⁵⁾ No-till: soil is left undisturbed from harvest to planting except for nutrient injection.

⁽⁶⁾ Ridge-till: residue is left on the surface between ridges.

⁽⁷⁾ Mulch-till: full-width tillage with the soil disturbed prior to planting.
